EXPERIENCE

Freelance, Remote — Web Developer

Jun 2020 - PRESENT

Participated in the entire lifecycle of 4+ websites from drafting a technical specification, to releasing in production, and everything in between.

- Meet with the clients to discuss websites' requirements and goals.
- Determine the structure and design of web pages, and ensure user experience determines design choices.
- Transform designs into front-end code with HTML, CSS and JavaScript.
- Debug errors, troubleshoot issues and always satisfy the clients through early and quality work.
- Implement web performance optimizations, and ensure web pages conform to accessibility standards.

Crwn-clothing, Remote — React Developer

Feb 2022 - PRESENT

Build a performant and responsive eCommerce application with React.

- Identify user interactions and develop highly-responsive and reusable UI components.
- Manage data including user information and shopping cart with React Context API and Hooks.
- Authenticate users via Firebase Authentication using Email, password, and Google.
- Store and retrieve product data via Firestore.
- Integrated with third-party API Stripe to complete payment.

Beijing Aidi School, Beijing, China — Chemistry Teacher

May 2014 - Nov 2016

Work at the best international high school in China as a Chemistry teacher. 75% of my students received offers from England and Australian universities, including Cambridge University and Sydney University.

- Conduct individual tutoring and group instruction on IGCSE and A-Level Chemistry.
- Collaborate with fellow educators to strategize the best tactics for improving teaching.
